Series A

SUBJECT INDEX TO VOLUME 34 (1991)

Mathematics

Orbit Shift Stability of Class of Self-Covering Maps ..... *CHEN Zao-ping* et al. (1)

A Characterization of Suzuki-Ree Groups ..... *SHI Wu-jie* et al. (14)

Enumeration of Latin Arrays (II)
—— Case $n=4$, $k\leqslant 4$ ..... *TAO Ren-ji* et al. (20)

Asymptotic Optimality for One Class of Truncated Sequential Tests ..... *CHEN Jia-ding* (30)

Computational Complexity on Numerical Integrals ..... *WANG Xing-hua* et al. (42)

On Indecomposable Modules Over a Representation-Finite Trivial Extension Algebra ..... *XIAO Jie* (129)

On Morse Conjecture of Metric Transitivity ..... *DING Tong-ren* (138)

Solvability and Well-Posedness of Higher-Order Abstract Cauchy Problems ..... *ZHENG Quan* (147)

Precise Fundamental Inequalities and Sum of Deficiencies ..... *YANG Le* (157)

Existence and Uniqueness of Smooth Solution for System of Ferro-magnetic Chain ..... *ZHOU Yu-lin* et al. (257)

Isomorphism Problem for Tensor Algebras Over Valued Graphs ..... *LIU Shao-xue* (267)

Comparison Theorems and Applications of Oscillation of Neutral Differential Equations ..... *YAN Ju-rang* (273)

A New Application of Davenport's Method ..... *LU Ming-gao* (385)

Convergence Rates of Law of Iterated Logarithm for B-Valued Random Variables ..... *LI De-li* (395)

Finite Difference Method of First Boundary Problem for Quasilinear Parabolic Systems (Continued) ..... *ZHOU Yu-lin* et al. (405)

Martingale Spaces and Geometrical Properties of Banach Spaces ..... *LIU Pei-de* (513)
Inverse Matrix and Properties of Double Determinant Over Quaternion Field ..... *CHEN Long-xuan* (528)
Immersions of n-Manifold in $R^{2n-\alpha(n)-1}$ up to Cobordism ..... *YANG Hua-jian* (541)
Brownian Motion Model of Entangled Polymers and Simulation for Disentanglement ..... *QIAN Min-ping* et al. (546)
A Remark Upon Sample Properties of N-Parameter d-Dimensional Ornstein-Unhlenbeck Process ..... *CHEN Xiong* (553)
A Representation of Non-zero Elements in Finite Field ..... *CHANG Yan-xun* et al. (641)
Perturbation for Elliptic Variational Inequalities ..... *ZHOU Shu-zi* (650)
On the Mean Value Formula of Dirichlet L-Functions (II) ..... *ZHANG Wen-peng* (660)
Spatial Patterning of Spruce Budworm in Circular Region ..... *GUO Ben-yu* et al. (676)
Generators of Vector Fields and Time Dependent Symmetries of Evolution Equations ..... *MA Wen-xiu* (769)
The Structure of LaSalle's Invariant Set for Lotka-Volterra Systems ..... *LIU Li* et al. (783)
Characterization of Primitive Extremal Matrices ..... *LIU Bo-lian* et al. (791)
The Structure of the Singular Symplectic Matrix Set ..... *LONG Yi-ming* (897)
Maximal Independent System of Units in Cyclotomic Function Fields ..... *FENG Ke-qin* et al. (908)
The Stability of a Heteroclinic Cycle for the Critical Case ..... *FENG Bei-ye* (920)
Galois Triple Covers of Surfaces ..... *TAN Sheng-li* (935)
Glauberman's Conjecture, Mazurov's Problem and Peng's Problem ..... *XIAO Wen-jun* (1025)
Generalized Cohomology Operations and the Finiteness of Multiplicative ψ_k-Modules ..... *PAN Jian-zhong* et al. (1032)
Three Primes Theorem in a Short Interval (III) ..... *JIA Chao-hua* (1039)
Orientation-Preserving Periodic Self-homeomorphisms of 2-Dimensional Orientable Manifolds ..... *MAI Jie-hua* (1057)
An Application of KAM Theorem of Reversible Systems ..... *LIU Bin* (1068)

Simultaneous Diophanitine Approximation ..... *WANG Lian-xiang* (1153)
Closed Surface With Prescribed Mean Curvature in R^3 ..... *HUANG Xuan-guo* (1162)
Components of the Essential Spectra of Quasi-similar Operators ..... *YAN Zi-kun* (1174)
Chaitin Complexity, Shannon Information Content of a Single Event and Infinite Random Sequences (I) ..... *YANG En-hui* et al. (1183)
3-Periodic Orbit Implying 6831726876986508 85-Periodic Orbits
—— Infimums of Numbers of Periodic Orbits in Continuous Functions ..... *MAI Jie-hua* (1194)
A Characteristics Mixed Finite Element Method of Numerical Simulation for 2-Phase Immiscible Flow ..... *LIANG Dong* (1281)
Permutation Modules, *p*-Permutation Modules and Conlon Species ..... *FAN Yun* (1290)
Involution Number Sequence and Dimensions of Components in Fixed Point Set of Involution ..... *YANG Hua-jian* (1302)
Chaitin Complexity, Shannon Information Content of a Single Event, and Infinite Random Sequences (II) ..... *YANG En-hui* et al. (1307)
An Affirmative Answer to Problem 24 of P. Turán ..... *SHI Ying-guang* (1320)
Hilbert C^*-Modules and Their Bounded Module Maps ..... *LIN Hua-xin* (1409)
On the Extended Matrix Disc Conjecture ..... *ZHOU Xiang-yu* (1422)
Relatively Complemented Distributive Lattice ..... *DONG Rong-sen* (1427)
Infinite Element Method for Elliptic Problems ..... *YING Long-an* (1438)
The Regularity of Viscosity Solutions for a Class of Fully Nonlinear Equations ..... *DONG Guang-chang* et al. (1448)

Physics

Theoretical Calculation of Vibrational and Rotational Excitation Cross Sections for He-H_2 Collision ..... *YANG Xiang-dong* (48)
Doping Mechanism of Conjugated Polymer With Conjugated Triple Bond ..... *PENG Jing-cui* (61)
The Optimized Expansion for sine-Gordon Field Theory at Zero and Finite Temperatures in $D+1$ Dimensions ..... *LOU Sen-yue* et al. (68)
Basic Equations for Suspension Flows With Interphase Mass Transfer ..... *LIU Da-you* et al. (166)
On Theory of Plastic Postbifurcation ..... *SU Xu-ming* (181)

An Analytical Model of the Cantilever Beam Subjected to Oblique Impact ..... *YU Tong-xi* (191)
Thermophysical Properties of Chinese Coals ..... *GU Yu-qin* (201)
Multivariable Finite Elements: Consistency and Optimization ..... *WU Chang-chun* et al. (284)
Improving Tried Wave Functions by Decreasing Energy Deviation of Fixed Samples ..... *SUN Zhi-wei* et al. (300)
Fundamental Solution of Bi-Material Elastic Space ..... *HUANG Ke-fu* et al. (309)
Angular Distribution in Photodissociation of Oriented Polyatomic Molecules ..... *XIANG Tian-xiang* (316)
Noether's Theorem and Its Inverse of Nonholonomic Nonconservative Dynamical Systems ..... *LIU Duan* (419)
Direct Measurement of Multiple Quantum Relaxation Time ..... *YE Chao-hui* et al. (430)
Attitude Motion of Dual-Spin Spacecraft Composed of Two Asymmetric Bodies ..... *YANG Hai-xing* (443)
Phase Transition and Crystal Structure of a New Compound — Sr_2CdWO_6 ..... *FU Zheng-min* (455)
Exact Analytic Solutions of Stationary and Fast Propagating Cracks in a Strip ..... *FAN Tian-you* (560)
New Examination on Theory of 2-Level Atoms ..... *HUANG Xiang-you* (570)
Effects of Stochastic Extension in Ideal Microcrack System ..... *XIA Meng-feng* et al. (579)
Optimization of Tried Wave Function in Quantum Monte Carlo Method ..... *HUANG Sheng-yu* et al. (689)
The Possibilities of Electrochemically Induced Nuclear Fusion of Deuterium ..... *JIN Shang-xian* et al. (697)
Validity of Excess Entropy Production Criterion of Thermodynamic Stability for Nonequilibrium Steady States ..... *WU Jin-ping* (708)
DV-X_α Method for Calculating *d-d* Ligand-Field Spectra and Its Application to $(CrF_6)^{3-}$ ..... *YANG Jin-long* et al. (803)
Application of the Probability Wave Theory of Atomic Configuration — The Ordered Structures of Compound Perovskite Materials ..... *GU Bing-lin* et al. (814)
On Dilatational Plastic Constitutive Equation of Ductile Materials and Plastic Loading Paths at Bifurcation ..... *LI Guo-chen* (825)
The Transitivity of Thermal Equilibrium and the Transitivity of Clock Rate Synchronization ..... *ZHAO Zheng* (835)
Some Theoretical Aspects of the Simplified Navier-Stokes (SNS) Equations ..... *CHEN Guo-qian* et al. (943)

Probability Wave Theory of the Atomic Configuration for Multi-component Crystal Structures ····· *GU Bing-lin* et al. (955)

$SU(2) \times SU(2)$ Quasi-spin Model and Methods for Restoring Broken Symmetries of Self-consistent Solutions (I)

—— An Exact Solution and HF Approximation ····· *LIAO Ji-zhi* (1079)

Effect of Organized Artificial Disturbances in Outer Region of Wall Turbulence on Fluctuating Characteristics of Inner Flow ····· *YAO Sheng-hong* et al. (1088)

Generalized Boussinesq Equation and KdV Equation

—— Painleve Properties, Backlund Transformations and Lax Pairs ····· *LOU Sen-yue* (1098)

A Possible Approach to Search for Dyons Under Bound Conditions ····· *ZHANG Jian-zu* (1205)

Analytic Solution to the Schrödinger Equation With a Harmonic Oscillator Potential Plus δ-Potential ····· *PENG Qing-zhi* et al. (1215)

Value Mapping and Parameterization Approach to Robust Stability Analysis ····· *HUANG Lin* et al. (1222)

New Pure Gauge-Boson Processes Involving Axigluons in Chiral-Color Model ····· *ZHANG Jian-zu* (1329)

Method for Measuring Resistance of Metals in Diamond Anvil Cell and the Measurement of Piezoresistance Coefficient of Manganin ····· *PU Feng-nian* et al. (1339)

Extended Feynman Formula for Harmonic Oscillator and Its Application ····· *LIANG Jiu-qing* et al. (1346)

Some Features of the Turbulence Produced by Rising Air Bubbles in Water ····· *JIA Fu* et al. (1458)

An Aggregate Function Method for Nonlinear Programming ····· *LI Xing-si* (1467)

q-Deformed Verma Representations of Quantum Algebra $sl_q(3)$ and New Type Yang-Baxter Matrices ····· *SUN Chang-pu* et al. (1474)

Astronomy

Short-Range Force in the Numerical Simulation of Large-Scale Structure in the Universe ····· *SONG Guo-xuan* et al. (79)

Discovery of New Compositions —— Li and B in Interplanetary Dust Particles ····· *XU Yin-lin* et al. (209)

On Kolmogorov Entropy of Some Measure-Preserving Mappings ····· *YAN Zhi-ming* et al. (214)

Exact Solution to Linear Vlasov Equation and Discussions on Landau Damping, Instabilities and Resonant Interactions ····· *CAI Heng-jin* et al. (324)

Data Reduction of Snapshot VLBI Observations ····· *NAN Ren-dong* et al. (590)

Redshift Distribution and Evolution Function of Quasi-Stellar Objects ····· *ZHOU You-yuan* et al. (598)

Morphology Category of Geomagnetic Storms and Characteristics of Interplanetary Magnetic Clouds
ZHANG Gong-liang (717)
Quasar Pairs and Quasar's Peculiar Velocity
CHU Yao-quan (841)
Geocentric Quasi-Fermi and Geocentric Harmonic Coordinate Systems
HAN Chun-hao et al. (848)
A Model of SVC Radiation in Magnetic Dipole Field and Radiation Varying With Magnetic Field (I)
—— Active Region Model and SVC Radiation Source Model
ZHAO Ren-yang (969)
A Model of SVC Radiation in Magnetic Dipole Field and Radiation Varying With Magnetic Field (II)
—— SVC Radiation Mechanism and Radiation Variation With Magnetic Field
ZHAO Ren-yang (1109)
Static and Stationary Black Holes With QCD Hairs ..... *YU Hong-wei* et al. (1233)
The Tangential Discontinuous Surface of Velocity in Solar Chromosphere
HU Wen-rui et al. (1354)
A Prediction of UT Series With Auto-adaptive Auto-regressive Model
DING Yue-rong et al. (1484)
Generation Mechanism of Magnetic Noise Bursts in the Earth's Magnetotail
ZHOU Guo-cheng et al. (1492)

Technological Sciences

A Knowledge-Based Image Database System (ISDBS)
WU Jian-kang et al. (87)
A Theory on Low-Energy Electron Scattering in Solids and Monte Carlo Calculation
HE Yan-cai et al. (94)
Phase Relationships in Quasi-systems R_2O_3-AlN-Al_2O_3 (R=Ce, Pr, Nd, Sm)
SUN Wei-ying et al. (105)
Effective Permittivity of Bounded Random Media ..... *JIN Hang* et al. (116)
Theoretical Calculation of Mill Steel Ball Size ..... *DUAN Xi-xiang* (220)
An Automatic Printed Chinese Character Recognition System on Microcomputer
ZHANG Xin-zhong et al. (229)
Three-Electrode High-Temperature Oxygen Sensor
CHEN Ai-fan et al. (240)
Eigenstructure Assignment for Time-Varying Linear Systems
DUAN Guang-ren et al. (246)
Theoretical Calculation of High-Temperature Phase Diagram of Fe-Mn Alloy
WU Fei et al. (336)
Quasilongitudinal Wave Along *Y*-Direction of $LiNbO_3$ and Its Ultrasonic Nonlinearity Parameters
JIANG Wen-hua et al. (346)
Plastic Constitutive Relation and Plastic Voluminal Deformation ..... *GAO Wan-zhang* (354)
Incremental Edge Wave Diffraction Coefficients
—— A New Method for Analyzing High-Frequency Edge Diffraction ..... *RUAN Cheng-li* et al. (366)

Multi-layer Structures and Optical Properties of SIMNI and SIMOX Materials ..... *LIN Cheng-lu* et al. (376)
3-Dimensional Analysis of Composite Residual Stresses Due to Twisted Fiber Bundles ..... *YAO Li-ning* et al. (467)
Nonlinear Theory of 3-dB Hybrid-Coupled Power Combiner ..... *WU Zheng-de* et al. (479)
A Unified Description of Free-Electron Masers —— Gyrokinetics ..... *ZHANG Shi-chang* (489)
Method of Solving the Radiative Transfer Equation for Atmosphere-Ocean System and Asymptotic State of Radiance in Sea Waters ..... *YOU Ming-chang* et al. (500)
Several Problems in Thermofluid Dynamics ..... *GUO Zeng-yuan* (613)
Mechanical Analyses on the *m*-Value of Superplastic Bulging ..... *SONG Yu-quan* (623)
Perturbation Approach to Solving the Radiative Transfer Equation for Ocean ..... *YOU Ming-chang* (633)
The Generalized Vector Method of Quantitative Texture Analysis ..... *ZUO Liang* et al. (732)
Determination of the Specific Inner Surface of Crystalline-amorphous Two-Phase System by Small-Angle X-Ray Scattering ..... *MENG Zhao-fu* et al. (740)
Concerning a Basic Assumption for Aeroelasticity in Turbomachinery ..... *YANG Xiao-dong* et al. (746)
X_α Study of Laser Crystal (IV)
—— A DV-X_α-HF Calculation of Alexandrite ..... *ZHU Ji-kang* et al. (755)
Studies on the Self-activated Laser Crystal: Neodymium Aluminium Borate $NdAl_3(BO_3)_4$ ..... *LUO Zun-du* et al. (762)
Performance Analysis of Static Data Flow Computers ..... *LIU Gui-zhong* et al. (857)
A New Approach to Analysis of Synchronous Machines With Asymmetrical Armature Windings (I)
—— Fundamentals and Approach ..... *ZHANG Long-zhao* et al. (866)
Framework of Algorithm Correctness in NDADAS ..... *LÜ Jian* (875)
Steepest Descent Approximation Theory for the Study of Optical Waveguide ..... *WEN Gen-wang* (885)
An Experimental Study on Turbulence Characteristics of Flows Over Smooth Spillway Dam ..... *CHEN Chang-zhi* et al. (977)
Grain Core-Grain Shell Structure and Lattice Defect in $SrTiO_3$ Ceramics ..... *SONG Xiang-yun* et al. (991)
A New Approach to Analysis of Synchronous Machines With Asymmetrical Armature Windings (II)
—— Parameter Calculation ..... *ZHANG Long-zhao* et al. (998)
A Set of New All-Direction Robust Regulation Indices ..... *WANG Da-hai* (1005)
Czochralski Silicon Crystal Growth in Nitrogen Atmosphere Under Reduced Pressure ..... *QUE Duan-lin* et al. (1017)
Spectroscopic Study on Superconductor $YBa_2Cu_3O_x$ ..... *CAI Ji-ye* et al. (1119)
Theoretical and Experimental Research on Thermal Sensor for Robot ..... *GAO Guo-wei* et al. (1126)
Network Observation of Ionospheric Disturbances During the WAGS in Octorber, 1985 ..... *LI Jun* et al. (1138)

A Quasi-physical Method for Solving the Scheduling Problem of Space Utilization ..... *LIU Jiong-lang* et al. (1144)
Shaped Dual-Reflector Antenna With Ring Focus ..... *ZHANG Ri-rong* et al. (1243)
A Novel Aluminium Composite Selective Absorbing Surface ..... *YIN Zhi-qiang* et al. (1256)
Electronic Structure of γ' Phase Containing Mg in Nickel-Based Superalloy ..... *WANG Chong-yu* et al. (1264)
High Frequency Photoacoustic Measurements in Air ..... *WANG Zhao-qiu* et al. (1273)
Evolution Equation of Optical Solitons in Femtosecond Regime ..... *GUO Qi* et al. (1365)
Deviation From Bragg Law and Edge Effect in Double-Crystal Diffraction ..... *LI Run-shen* (1378)
Experiments on High-Gain Soft X-Ray Laser in Ne-Like Ge Plasma ..... *WANG Shi-ji* et al. (1388)
The Existence and Design of Regular State Asymptotic Observer for Singular Systems ..... *YANG Cheng-wu* et al. (1400)
A Novel Catalytic Sensor for Monitoring the Concentration of Mixed Combustible Gases ..... *LOU Rui-xian* et al. (1500)
A Fuzzy Decision-making Technique With Two Kinds of Uncertainty ..... *ZHANG Hua-guang* et al. (1508)
Magnetic Properties of Nd-Fe(Co, Al, Ga)-B Alloys and the Site Occupations of Al, Co, Ga Elements ..... *PAN Shu-ming* et al. (1519)
